

# we are together

## As a young designer I am committed

### TO DESIGN

and optimize my works in order to guarantee the creation of a product with a lower environmental impact.

### TO INFORM MYSELF

promoting the fundamental values of a designer: Reduce, Reuse, Repair, Recycle, Rethink, Redesign to the IED community to contribute to the protection of the planet.

### TO SOLVE PROBLEMS

identifying practical solutions and avoiding waste of resources

### TO USE PROPERLY RESOURCES

at my disposal in a conscious and responsible way according to the principles of the circular economy.

### TO BE CONSISTENT

in reducing emissions both physical and digital both in work and in private life.

### TO GUARANTEE INCLUSIVITY

creating a suitable work environment with the correct welcome atmosphere in order to achieve a state of equity and equal opportunities.

### TO COOPERATE

and share my skills and knowledge making them available for the common good by collaborating in projects related to environmental and social sustainability.

### TO BE CONSCIOUS

and to fight to lead over time to a society which is more respectful of others and the environment around us.

### TO RESPECT

the right of the individual and his or her freedom of expression, as long as it does not limit that of others, in order to establish a working environment which favors collaboration.

### TO BE SUPPORTIVE

towards other students, helping as I can, those who are in difficulty.

By this Sustainability Manifesto, we Green Ambassadors address the whole IED Community. We want to stir the conscience of every Designer and sound an alarm bell by offering each of us a chance to reflect. The Manifesto invites us to adopt sustainable behaviours both from an **environmental** and a **social** point of view. Being "Green" in fact means not only safeguarding the environment but also being respectful towards others.
